

Dear Students,

Experiments will begin when the experiment and course assistant programs are completed. Follow the relevant announcements made from the Ninova.

Experiments will be carried out in the Electronics Lab (on the right in corridor no. 3 on the floor where the photocopy is located).

Please attend all the experiments, if you have any official excuse, you can get only one experiment as a make-up experiment. You must immediately notify your course instructor by sending an e-mail including your official excuse to attend make-up experiment.

If you don't attend more than one experiment without any excuse, you will fail the course.

All students are expected to be prepared for the experiment and have read the relevant section of the experiment sheet before the experiment.

The experiments will be monitored and graded by course assistants.

Your experiments will be graded based on what you did during the session and your answers to the course assistant's questions. Protocol sheets must be uploaded before the deadline for the relevant homework assignment opened in the Ninova after the experiment. E-mails are not accepted. All students should upload the protocol sheets individually.

If a student is more than 10 minutes late for the experiment, that student won't be admitted to the experiment.

Follow the announcements carefully and be ready in the laboratory at the time of the experiment. Pay attention to the time of the experiments. Some courses start at 12.30.

Good luck,
