

Instructor: Prof. Dr. Ahmet Hamdi Kayran
Teaching Assistant: Tolga Ok (okt@itu.edu.tr)

- **Solve the exam on your own.** You must complete the exam questions independently. Cheating, in any form, is **strictly prohibited** and can have serious consequences.
- **Late submissions will not be accepted.** Please do not email us your late submissions. You are expected to submit your solutions only through Ninova before the due date.
- Write out the solutions to each question on an A4 paper using an **unerasable pen**. Use at least one page per question and use only one side of the paper, and remember to include your name, ID, and signature on each paper. Merge the images of each paper in a pdf file with the correct rotation.
- **Show your work.** To get a good grade, make sure to include all the necessary steps in your solution. Displaying the intermediate steps instead of going directly to the conclusion is important.
- The final exam contributes **40%** to your overall grade.

Question 1 [20 pts]

Octavian is watching a television series. At the end of each episode, he either enjoys the episode or dislikes it. If he enjoyed the previous episode, the probability that he will enjoy the next one is 0.75. If he disliked the previous episode, he enjoys the next one with 0.5 probability. Initially, he is very hyped for the series, as he has already enjoyed the trailer, which is considered episode 0. What is the probability that he enjoys the third episode? Explain your reasoning.
